Defect No.	Defect Description	Defect severity	Test Case No. OR Description
1	In MainActivity page, the account creation function is not working. After a new account is created, the user is not able to login. The program sends an "invalid credentials!:(\" to the interface and does not bringing the user to Browse Activity page.	3	MainActivity Functions-Test Case 1
2	In MainActivity page, using google account to login is unsuccessful. User is able to link his google account to the app. The app can store the user linked google account and verify it correctly. After the authentication, the app does not bring the user to Browse Activity page.	1	MainActivity Functions-Test Case 2
3	In MainActivity page, using facebook account to login is unsuccessful. User is not allowed to link his facebook account to the app. After the authentication, the app does not bring the user to Browse Activity page.	1	MainActivity Functions-Test Case 2
4	In MainActivity page, using facebook account to login is unsuccessful. Since the app is still in development mode the user needs to be whitelisted.	1	MainActivity Functions-Test Case 2

5	In MainActivity page, the console returns “E/eglCodecCommon: glUtilsParamSize: unknow param 0x00008cdfgl UtilsParamSize: unknow param 0x00008824” error. This does not seem to crash the app.	3	MainActivity Functions- Test Case 1
6	In BrowseActivity Page, the search function is not working with any keyword that match with the movie title in the database. It will show a blank page instead.	3	BrowseActivity Functions- Test Case 0
7	In BrowseActivity page, the search bar will not be triggered until the user clicks on the search icon. The “bar” does not exist/work.	3	BrowseActivity Functions- Test Case 0
8	In BrowseActivity page, the movie title “Age of Ultron” is using the picture of the other movie (John Wick: chapter 2) instead of the correct picture for “Age of Ultron”.	1	BrowseActivity Functions- Additional test case 1 (checking all the movie display the correct picture corresponding to the movie title)
9	In BrowseActivity page, there two extra duplications of the same movie (“Minions”) at the bottom of the page. They will link to the same information page. One of the duplication is displaying an incorrect picture.	1	BrowseActivity Functions- Additional test case 2 (checking all the movie display correctly in Browse Activity page)
10	In BrowseActivity page, one of the movie (Geostorm) is missing its movie title. The movie title user can see is null instead of “Geostorm”.	1	BrowseActivity Functions- Additional test case 2(checking all the movie display correctly in Browse Activity page)
11	In BrowseActivity page, the first instance of Minions is using the movie picture of Jumanji (1995). The movie title is supposed to Jumanji.	1	BrowseActivity Functions- Additional test case 2
12	In BrowseActivity page, Thor: Ragnorok is showing the picture for	1	BrowseActivity Functions- Additional test case 2

	Dunkirk.		
13	In BrowseActivity page, scrolling past the bottom (or at the top of page) does not seem to do anything. Expected UI to load more titles.	3	BrowseActivity Functions- Additional test case 2
14	In InfoPage Activity page, Thor: Ragnarok is showing the picture for Dunkirk.	1	InfoPageActivity Functions- Test case 0
15	In InfoPage Activity page, one of the movie ("Lucy") is connecting to the wrong movie information page("Coco").	2	InfoPageActivity Functions- Test case 0
16	In InfoPage Activity page, couple movies are missing it's IMDb rating. It display "IMDb rating: null" instead of "IMDb rating:<digit>".	2	InfoPageActivity Functions- Test case 0
17	In InfoPage Activity page of Blade Runner 2049, the year of movie release is 3005 which has not happened yet. The correct year should be 2017.	2	InfoPageActivity Functions- Test case 0
18	In InfoPage Activity page, clicking on Sleight from the BrowseActivity page takes you to the info of Hunger Games: Mockingjay- Part 1.	2	InfoPageActivity Functions- Test Case 0
19	In InfoPage Activity page, the add movie to the library function is not stable(not working sometime) in all movie infoPage. After clicking "add to library" button (top right corner), it send out a message "Unfortunately, MovieQ has stopped." and redirect user to BrowseActivity page which is undesirable. Required user to re-login to fix it.	2	InfoPageActivity Functions- test case 1
20	In InfoPage Activity page, the back to the previous page function has incorrect function in any movie infoPage. After clicking "BACK" button (top left corner), it log user out	2	InfoPageActivity Functions- additional test case 1

	of the application and redirect user to Main Activity page which is undesirable.		
21	In MyLibraryActivity page, the search function is not working. After entering keyword in the search bar. MyLibraryActivity page does not show anything.	3	MyLibraryActivity Functions-Test Case 0
22	In MyLibrary Activity page, delete movie from library function is not working. After clicking the movie image and directed to the correct information page. However, the delete movie from library button is not exist. This function cannot be trigger.	3	MyLibraryActivity Functions-Additional Test Case 1 (testing the function of removing a movie from the library)
23	In MainActivity page, the button direct the user to my library page is not working. It does not direct user to MyLibrary Activity Page. The only way to visit MyLibrary Activity Page is to add a movie to the user's library.	3	MainActivity Functions- Additional Test Case 3 (testing the function of directing user to myLibrary page)
24	In MyLibrary Activity page, clicking on the movie added bring you to its InfoPageActivity. There should be a button for removing from library in place of the Add to Library button. Clicking on the Add to Library button then returns you to the Library with it still there and shows a message "Deleted from Library"	2	MyLibraryActivity Functions-Additional Test Case 1 (testing the function of removing a movie from the library)

In the last column: Specify the test case number through which you found the defect. If you think that your test plan lacks some important test cases and you find a defect through that additional test case, then specify a brief description of the test. The defects will be evaluated based on how well the defect is described, the severity assignment, and how well the test case is described (in case of a test case description). Also, remember that the software product is

seeded with 25 defects. So, we will check whether you were able to catch those seeded defects.
