Higher Order Defect log

Hon Wing Eric Chan

Omar Raza

Sanjeet Suhag

Jackie Wu

Defect No.	Defect Description	Defect Severity	Type of Higher-Order Testing	Test Case No. or Description
1	Quickly clicking on multiple items in the grid in BrowseActivity results in a crashing.	3	Stress Testing	Open the application and rapidly select different items in the BrowseActivity grid.
2.	High latency conditions result in network request timeouts in MainActivity.	3	Performance Testing	Use Linux's netem to simulate a high latency connection which triggers default Android HTTP(S) timeouts.
3.	Quickly moving up and down in the info Activity page resulting in crashing.	3	Stress Testing	Use UI exerciser Monkey generates pseudo-random streams of current page.
4	No longer able to login with created account or default accounts (always return message "invalid Credentials!:(") after crashing that caused by defect No.3.	1	Stress Testing	Use UI exerciser Monkey generates pseudo-random streams of the application.
5.	Items in	3	Usability Testing	Items in

	BrowseActivity with long names cause the grid design to break.			BrowseActivity which have really long names gave the text label higher UI position priority than the image when scrolling up quickly.
6.	Fetching IMDB rating can sometimes take a long time and crash the app.	2	Usability Testing	Selecting an item at random can sometimes cause the loading popup to render for a long time and crash the time.
